- Figma
- Blender
- n8n

CERTIFICATIONS

Java (LinkedIn Learning)
Basic SQL (LinkedIn Learning)

EXPERIENCE

Video Editing

- Edited videos for college club INOVX.
Video 1 | Video 2 | Video 3

ABOUT ME

- I am an aspiring web developer and creative video editor. My passion is to work in the tech industry and bring my creative vision to life in my professional work.
- Continuously exploring web development, UI/UX design, and modern tools to build practical, user-focused digital experiences.
- Currently learning advanced technical skills to kickstart my freelancing journey and collaborate on impactful, real-world projects.

PROJECTS

NexFlow - AI Workflow Automation Platform

- Developed a full-stack SaaS platform that enables users to create AI-powered automated workflows using natural language prompts and external service integrations.
- Built an interactive dashboard with workflow creation, execution tracking, and a modern user-focused interface for seamless automation management.
- Implemented AI-powered automation with support for Google services including Gmail, Calendar, Sheets, Docs, and Slides, enabling real-time task execution and multi-service workflow handling.
- Tech Stack: React, TypeScript, TailwindCSS, Python, Flask, Supabase, PostgreSQL, OpenAI API, Google APIs, Telegram Bot API

Web-based Supermarket POS-Lite & Order Management System

- Developed a full-stack, web-based supermarket ordering system enabling customers to browse products, manage carts, and place orders online.
- Integrated **Razorpay payment gateway** to support secure online payments (UPI, cards, net banking) along with Cash on Delivery (COD).
- Built dedicated **admin and staff portals** to manage product catalog, stock, pricing, and order fulfillment workflows (pick, pack, deliver).
- Tech Stack: React, Vite, Supabase (PostgreSQL, Auth), Razorpay, Cloudinary, JavaScript, HTML, CSS

SyncShare - Social Media Scheduling Platform

In Progress

- Developing a SaaS platform for scheduling and publishing content across YouTube, LinkedIn, and Instagram with OAuth and AI-generated captions.
- Building a React frontend with TypeScript, TailwindCSS, and shadcn/ui featuring dashboards, scheduling, and workflow automation.
- Implementing Supabase backend with PostgreSQL, edge functions, OAuth integrations, and Cloudinary media handling.
- Tech Stack: React, TypeScript, TailwindCSS, shadcn/ui, Supabase, PostgreSQL, ReactFlow, Cloudinary API, OpenAI API
